

San Cristóbal de La Laguna, 20/05/2025

Justo Roberto Pérez Cruz, Full Professor of Applied Physics in the Department of Physics of La Laguna University

To whom it may concern:

Mr. Alberto Reyes Castro has been student in the Degree of Physics in the Faculty of Sciences of La Laguna University. I have been his teacher in the subjects of Thermodynamics and Computational Physics.

As it can be seen in his academic record he has been a bright student. I have observed that he has a high capacity of autonomous learning, willingness to learn new things and good disposition to address new challenges even beyond the subject syllabus

He has shown very good analysis capacity, depth in the discussion of results and good communication skills which enables him to both individual as teamwork in whatever specialized activity of research, learning or work.

In particular, he has special abilities in the field of Computational Physics, with good programming skills, in particular in Python, strength in the mathematical knowledge and natural easy for learning in this field.

So I highly recommend him to be accepted in whatever Master, Doctorate study or job that he want to undertake.

Sincerely

Justo Roberto Pérez Cruz
Full Professor of Physics
La Laguna University
